

## Windows Small Business Server 2003

A reliable, secure and affordable network solution for small to medium business.

Today's business environment demands that small businesses do more with less. As a small business, you have limited time and resources to get the job done and keep your business running. Technology can simplify your daily activities while saving you time and money.

Designed with small business needs in mind, Windows Small Business Server 2003 is a complete and affordable network solution. It will give you confidence that your data is secure, untap new productivity from your desktops, empower your employees to do more, and connect to your customers like never before.

Windows Small Business Server 2003 provides many of the networking features used by large companies, without the complexity typically associated with server technology. It delivers a complete business server solution for small businesses with up to 75 workstations and is available in two editions: standard and premium.

**"...by matching the advanced features of Small Business Server with a secure VPN solution from Cisco, Solsis were able to provide the remote access requirements needed to boost productivity".**

### Does my business need a server?

Review the following scenarios and note how many apply to your business. If more than one apply, then you should consider adding a server.

- You have two or more computers in your business that you need to connect.
- You need to save money by sharing equipment and resources such as printers, fax machines, and Internet connectivity.
- You need to protect business information and your network from unauthorised users.
- You need to backup information.
- You need to restore accidentally deleted files or previous versions of files.
- You need to access company information and resources while away from the office.
- You need to store, access, and share information in one central location.
- You need to manage different versions of files.
- You need to easily schedule group meetings and communicate efficiently with colleagues.
- You need a tool to share ideas and information with your colleagues.
- You need to present a professional image by hosting your own Web site and e-mail system.
- You need to communicate more effectively with customers, partners, and suppliers.

## Top Ten Reasons to use Windows Small Business Server 2003

- 1 Increase productivity by organising your information in one location.
- 2 Guard against lost data.
- 3 Keep your vital information more secure.
- 4 Keep your network up and running with a reliable network.
- 5 Stay connected with your business and customers anytime, anywhere
- 6 Help employees work together more effectively by sharing information.
- 7 Reduce costs by sharing resources.
- 8 Create a tighter link with your customers.
- 9 Get the freedom and efficiency of mobile connections.
- 10 Have the assurance of a flexible, affordable platform.

## Keep Your Business Running and Your Data Secure

Windows Small Business Server 2003 secures your network, keeps it up and running, and automatically protects your business information, allowing you to spend more time focusing on your business and less time and money on technology issues. You can:

- Keep your business up and running with an operating system that provides your employees with a working environment they can depend on.
- Protect your business and prevent lost productivity. Windows Small Business Server 2003 provides a secure infrastructure, including built-in firewall protection and secure remote access.
- Prevent data loss by automatically backing up company information. Your employees can easily retrieve accidentally deleted files and restore them to their previous versions.

## Maximise Employee Productivity

Your employees can easily find and share information in one centralised location, communicate and collaborate with their peers more effectively, and remotely access business information and resources. Windows Small Business Server 2003 enables you to:

- Provide one central place to store business information, making it easy for your employees to find and access the data they need at any time.
- Improve team performance by providing your employees with an internal Web site, where they can find and share documents and collaborate on group projects.
- Get the most value from your technology investment. Windows Small Business Server 2003 enables you to share resources and equipment such as printers, fax machines and phone lines.
- Access business information when away from the office. Employees can stay productive while on the road by having access to their e-mail, internal Web site, network files and even business applications from any PC with Internet access.
