

## First Line Ltd

### Your First Choice for Products in the Vehicle Servicing Sector

First Line Ltd is an established world wide supplier of products to the vehicle servicing sector. They have over 23 years of experience providing quality automotive components to the vehicle market. Their product portfolio includes an extensive range of chassis, engine and braking components.

## The Project

First Line Ltd were in a vulnerable position, with old Information Technology providing no real business benefit or scope for development – in the form of NT4 as their main domain management system. Older generation hardware was being used to run the NT4 system, meaning performance and resilience was hindering the organisations business performance as a whole.

## Solution

When considering First Lines' specific business requirements, Solsis decided that the HP ProLiant ml370 G5 Server combined with Windows Server 2003 would best meet First Line's needs. These technologies were chosen as market leaders that directly met the client's requirements – to provide a stable and resilient network infrastructure. A new License agreement from Microsoft was also introduced to enable flexible and manageable long term license usage rights, over and above the traditional OEM installations undertaken in the past.

## Principle Technologies

- HP ProLiant Server Technology
- Microsoft Windows Server 2003

## Benefits

Solsis worked with First Line to identify the components of the solution that would best benefit their business. The solution Solsis implemented has given First Line a robust and secure infrastructure at domain management level that allow them to concentrate upon running the business and not worrying about out-of-date technology. They now have an advanced ICT platform upon which further business applications can be deployed to support future growth.

## Why Solsis

When asked why Solsis was chosen to update their ageing platforms, Chris Green from First Line stated *"we were impressed by Solsis' high level of customer satisfaction and references, combined with the fact that they were fairly local to us. They were professional and courteous at all times, and we really felt they knew how to meet our business requirements. I would certainly recommend Solsis to other UK businesses!"*
